Professional Summary

Computer Science graduate skilled in Python, SQL, Excel, Power BI, data cleaning, EDA, and data visualization. Seeking an entry-level Data Analyst role to analyze data, identify meaningful patterns, and deliver data-driven insights for informed business decisions.

Education

Marri Laxman Reddy Institute of Technology and Management, Hyderabad 2021 – 2025
Bachelor of Technology (B.Tech) in Computer Science and Engineering — CGPA: 8.07

Narayana Junior College, Hyderabad 2019 – 2021
Intermediate (MPC – Mathematics, Physics, and Chemistry) — 87.6 %

Bhashyam High School, Hyderabad 2018 – 2019
Secondary Education — CGPA: 9.50

Technical Skills

- **Languages:** Python
- **Database:** SQL, MySQL
- **Data Analysis:** Pandas, NumPy, Data Cleaning, Exploratory Data Analysis
- **Data Visualization:** Excel, Power BI
- **Statistics:** Descriptive Statistics, Basic Statistical Analysis
- **Tools:** Git, GitHub, Jupyter Notebook
- **Additional:** Manual Testing, JavaScript, TypeScript, React.js, Node.js, MongoDB

Projects

Bank Lending & Loan Outcome Intelligence (5–7 Days) GitHub

- Excel, SQL, Python, Pandas, NumPy, Power BI — Analyzed 2024 HMDA mortgage lending data for Texas to uncover patterns in loan outcomes across borrower, loan, and lender characteristics.
- Cleaned and transformed 709K+ loan applications, performed advanced SQL analysis, and built an interactive Power BI dashboard to identify factors associated with loan origination and denial outcomes.

Road Accident Hotspot Intelligence (4–5 Days) GitHub

- Python, Pandas, NumPy, SQL, Power BI — Cleaned and analyzed accident data to identify patterns across locations, time periods, and road conditions.
- Identified high-risk accident hotspots and conditions to highlight areas where road-safety interventions should be prioritized.

Water Consumption & Resource Intelligence (2–3 Days) GitHub

- SQL — Analyzed water consumption data to identify usage patterns, peak-demand periods, and consumption trends.
- Identified where and when water usage was highest to support better demand and resource management.

Air Quality & Pollution Intelligence (2–3 Days) GitHub

- Power BI — Analyzed air-quality data to visualize pollutant trends, locations, and periods of elevated pollution.
- Identified persistent pollution hotspots to determine where pollution-control efforts should be prioritized.

Agricultural Market Price Volatility Analysis (2–3 Days) GitHub

- Excel — Analyzed commodity price data to compare price movements, market trends, and volatility across crops and markets.
- Identified crops and markets with high price volatility and periods of significant price changes to support better market decisions.

Professional Training

QSpiders, Hyderabad 2026
Data Analyst Training - 5 Months

- Gained hands-on experience in Python, SQL, Microsoft Excel, Power BI, Statistics, and Data Visualization
- Worked on data cleaning, analysis, dashboard creation, and report generation using real-world datasets

Naresh i Technologies, Hyderabad 2025
UI Full Stack Development (React) - 6 Months

- Trained in HTML5, CSS3, JavaScript (ES6+), React.js, Node.js, Express.js, and MongoDB
- Created full-stack applications and practiced REST API development and authentication

Certifications

Full Stack Developer Bootcamp - GeeksforGeeks | Smart India Hackathon (SIH) 2023 - Internal Hackathon Participant
